and high speed 3.3V applications; it can be interfaced to 5V signal environment for both inputs and outputs.

It has same speed performance at 3.3V than 5V AC/ACT family, combined with a lower power consumption.

This device is designed to be used with 3 state memory address drivers, etc.

All inputs and outputs are equipped with protection circuits against static discharge, giving them 2KV ESD immunity and transient excess voltage.
