## Description

The **TS3431** is an adjustable shunt voltage reference with guaranteed temperature stability over the entire operating temperature range ( $-40^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ ). The output voltage can be set to any value between 1.24 V and 24 V with an external resistor bridge.

Available in SOT23-3 surface mount package, it can be used in application designs where space saving is critical.
